

Cooper and Patterson are proud to be the plumbing and heating contractor attached to the first phase of the stunning Highgrove Community development in Harraby Green, Carlisle. This collection of 98 bespoke new homes and apartments is located with in easy reach of the city center, yet far enough out of town for you to feel like you are in the heart of a Cumbrian village.

The development has been lovingly landscaped with mature trees and shrubs to create the look and feel of a well-established community. With a mix of three, four and five bed roomed homes along with one-bedroom apartments, the community caters equally for families, city professionals and those seeking a comfortable and relaxed retirement.

The developer Christopher Harrison had a clear vision for the project; they wanted the best! The best builders, the best landscapers, the best electricians, the best plumbing and heating contractors and that's where Cooper and Patterson come in.

“This project was the biggest contract we have undertaken to date, it was a challenge as Christopher was very clear about what he wanted. These are upscale homes so only the best would be acceptable and I am please to say we have been on-time, on-budget and have delivered an extremely high quality finish on all our work”

The project is still ongoing as phase one comes to an end and we sincerely hope the quality of our work has made us stand out from the crowd.
